**THE STORY OF AN ANKLE**

Kenneth MacDonald

*United Kingdom*

Patient presentation.

I have spent most of my life in education. Glasgow university/ Jordanhill for teacher training, Denny High school as a maths teacher, then in Guidance and Counselling. Finally Assistant Rector there before finishing at Balfron High School as Depute Rector. Married for 45 years this year, retired for 14 years, interests golf badly and Art even worse. Now restricted to gardening and computing. Four French grandchildren. I speak the language very badly except for money, wine and food when my vocabulary becomes very good. This presentation is given from a patient's perspective. I aim to have a light hearted look at the various treatments I have had and the influences ulcers have had on my life.
