

25 years of EWMA conferences

During the previous 25 years, EWMA has visited many great cities and countries with our annual (and in some years bi-annual) conference. The majority of these have been held in collaboration with national wound management associations, many of which became cooperating organisations of EWMA in 2001 when this formalised collaboration was initiated.

Below is an overview of the previous EWMA conferences and their visual design. We look forward to visiting new cities in future years. Upcoming are EWMA 2017 in Amsterdam and EWMA 2018 in Poland.

The EWMA conference – 25 years of successful development

Since the year 2000, EWMA has continuously worked on developing the annual conference to include all the different aspects of wound management. We have also extended the collaboration with many of our partner organisations to include exchanges of knowledge during the EWMA Conference and vice versa. At the same time we have experienced an increasing interest from participants as well as exhibitors in using the EWMA conference as a hub for knowledge exchange and networking. This increase is illustrated in the graphs below:

Total number of participants

Development in the number of participants at the EWMA Conferences (2000-2015).

Scientific presentations

Development in the number of scientific presentations at the EWMA Conferences (2000-2015).

Exhibiting companies

Growth of EWMA exhibition in total number of exhibitors over the last 7 years (2009 -2015)

Countries represented

Development in the number of countries represented by participants at the EWMA Conferences (2001-2015).
