OTHER COLLABORATORS:
 **RiksSår** Swedish Registry of Ulcer Treatment

Oxygen Therapies Masterclass

Oxygen is essential for wound healing. Oxygen therapies include hyperbaric oxygen therapy (HBOT) and topical oxygen therapy (TOT) as well as other treatments.

With the EWMA Masterclass on Oxygen Therapies in Wound Healing, EWMA provides a unique learning opportunity for interacting with some of the most renowned experts in the field of oxygen therapies.

The masterclass is a special educational activity based on the EWMA Document *Use of Oxygen Therapies in Wound Healing*, published in April 2017.

Download a free copy at EWMA.org

Please notice that participation in the masterclass requires separate registration at the cost of 95 EUR at EWMA2019.org

TUESDAY 4 JUNE

12:00 – 12:30	Registration and welcome
12:30 – 13:00	Lunch
