

# The EWMA Compression Therapy Campaign

## It's not magic, it's compression!

The **EWMA Compression Therapy Campaign** aims to increase the use of and access to compression therapy by raising awareness that:

- Compression is a powerful evidence-based therapy, and patients have a right to receive it!
- Introducing compression therapy early can speed up healing in most lower leg wounds.
- Compression therapy comes in many forms and can be simple to use.
- Compression therapy should be used and understood by nurses, doctors and allied health professionals.
- Compression therapy reduces pain and improves quality of life.

### AVAILABLE RESOURCES & EDUCATIONAL EVENTS

**Video explainer:** Compression Therapy & Leg Ulcers  
Presents the key messages on why, when and how to use compression therapy in leg ulcer management.

**E-learning module:** Compression Therapy in Wound Management  
Short e-learning course outlining why, when and how to use compression therapy correctly.

**One-page guidance:** Infographics presenting key messages about the importance and correct use of compression therapy in lower leg ulcer management.

**Live & on-demand webinars:** Held in collaboration with national associations.

**Compression Therapy Masterclasses:** Held in connection with the annual EWMA Conferences.

*Most resources are available in English, French, German, Italian, Portuguese and Spanish.*

**Please share these key messages and resources with your patients and colleagues. We need YOU to help keep patients safe!**
